**Justification of scores:**

Physical target has been achieved within the stipulated time. The survival percentage, growth and health of the plantations are satisfactory. The plantation performance can be graded as outstanding because their performance has been recorded in stress condition. Protection from grazing pressure has been taken care properly.

Degree of people's participation has also been reflected as there have been regular meetings both in VFMCs and FDAs. Meeting register of VFMCs have been maintained properly. Moreover 64 Micro-plans have already been prepared. EPA activities have also taken place and people are getting the benefit from the activities. Awareness has been spread although capacity building activities must be more strengthened.

Composition of General and Executive Body of FDA followed the NAEB guidelines. The frequency of visit of top level officials should be more in the plantation area with generation of field reports. Flow or release of funds from NAEB used to be slow although the available funds were disbursed among the VFMC rightly within time. Submissions of quarterly and annual reports are regular among many strong points of Deoghar FDA performance.
